

About Ozone and Ozone-Free germicidal lamp

- 1 Sailon UVC lighting can be produce ozone and ozone-free Germicidal lamp
- 2 Ozone-Free ultraviolet lamp,253.7nm UV radiation,mainly used for sterilization.
- 3 Ozone ultraviolet lamp,UV radiation between 185nm-253.7nm.In addition to being able to disinfect,185nm ultraviolet radiation can be produced Ozone thought air. Ozone has strong oxidants,it has the effect of sterilization and deodorization.
- 4 Ozone can be decomposed organic matter,reduce the TOC in the water,it widely used for semiconductor,and manufacture of high purity water in the Industrial
